TAEHA CORPORATION Since 1994

TAEHA CORPORATION
INNOVATE
PRECISION
DISPENSING
TECHNOLOGY

“ In order to provide competitive advantage to our customers who are in contact with us, we are constantly working on developing new technologies. We will continue to try to realize the process that customers want to do in the most accurate and efficient way. ”

『Honesty, Credibility, Creative』

Dispensing equipment total solution – TAEHA CORPORATION

TAEHA is the company of specialized in dispensing system total solution with the motto of Honesty, Credibility and Creative. We have designed, manufactured and supplied related dispensing equipment throughout the industry, including electronics, automobiles, bio and machinery, with the conviction of “We respond to customer’s needs with trust and accurate technology”, the various countries including domestic company.

Dispenser is a complex of various technologies such as machinery, control and chemistry etc, and is an industry that requires continuous research and new technologies and techniques. Now we are constantly developing new products and technologies to meet customer’s needs and are focusing on developing in to a world-class dispensing equipment total solution company with a strong foundation and a wide variety of applications

We will continue to strive to become a company that works hard with faith.

Thanks!

CEO **Kiryong Han**

Precision Dispensing System

Dispensing system has a wide variety of solutions. So there are various products and many kinds of selection method, and the materials used in dispensers are also diverse. The user must consider all of conditions in order to achieve the best solution for their work

Material

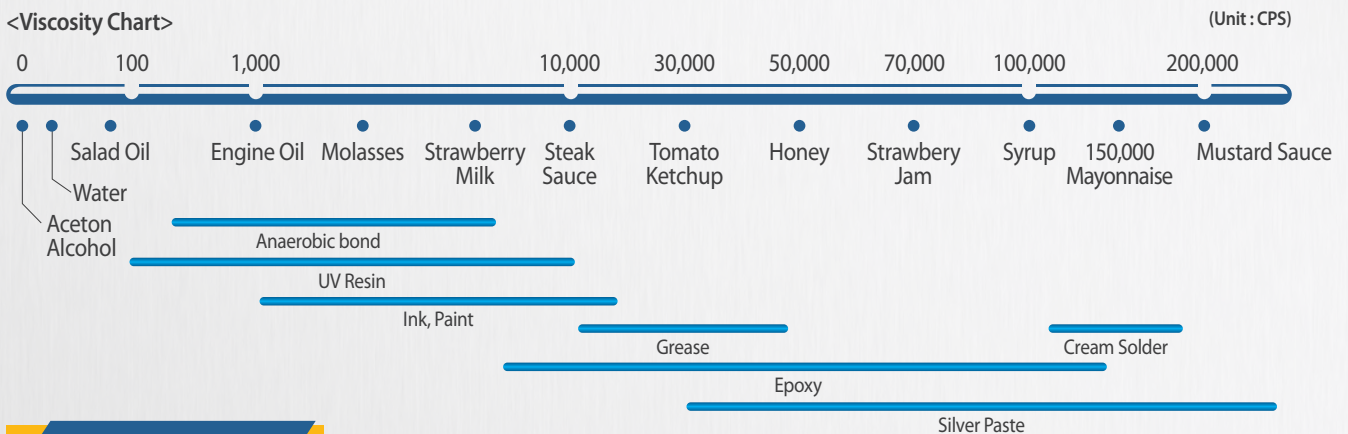

Type

Cyano type bond(adhesive), 1K Epoxy, 2K Epoxy, Anaerobic bond, UV bond, RTV Silicone etc.
Each material has very different characteristics so it is needed to select a suitable system.
Consulting with engineers to select the best system for the material and work process.

Viscosity

The viscosity of the material is the most important consideration in selecting the system. From low viscosity materials such as water to high viscosity materials on the paste, viscosity is a must-know information from the beginning of the system selection. However, if not sure, you can roughly convert viscosity of the material that you can easily access in daily life by referring below viscosity table.

<Viscosity Chart>

Volume of dispensing

Dispensing volume and rates of error must be accurate.
ex) Dispensing volume 0.1ml, less than $\pm 10\%$ (1ml=1cc)

Please refer to the visualization of the dispensing volume and figure as below.

Dots

Volume of a dot = $\frac{1}{2}$ the volume of a sphere = $v = .2618d^3$
→ | ← : diameter of dot(d)

dot	•	•	•	•	•	•	•	•	•	•
Volume(CC)	0,0003	0,0001	0,0005	0,003	0,009	0,021	0,029	0,046	0,059	0,075
mm	0,5	0,8	1,3	2,3	3,3	4,3	4,8	5,6	6,1	6,6
inches	0,02	0,03	0,05	0,09	0,13	0,17	0,19	0,22	0,24	0,26

Lines

Volume of a line = $\frac{1}{2}$ the volume of a cylinder = $v = \frac{1}{2} \pi r^2 l$ ($\pi = 3,1416$)

Line Width	Volume(cc)
0,5mm wide	0,00098
1mm wide	0,00393
1,5mm wide	0,0088
2mm wide	0,157
2,5mm wide	0,245

Figure of dispensing

It can be produced with Shower Needle, Special made Needle, X-Y-Z robot system and etc, to create various figure of dispensing.

PRO-PUMP Principle & Features

Progressive cavity pumps allow accurate metering/feeding/dispensing of materials that are difficult release due to their innovative structure and excellent precision

ROTOR ●
Single-threaded screw. Eccentric rotation when moving with stator

CAVITY ●
(Sealed space)

STATOR ●
Double-threaded screw, Stator is fixed and forms a cavity (sealed space) when moving with rotor.

“The combination of rotor and stator makes √Non-pulsating conveyance and √Precise metered displacement”

<Movement of cavity through 180° rotation of rotor>

Since the cross-sectional area of cavity is always constant regardless of the position of the rotor, dispensing volume is also constant and dispensing volume per unit time is in direct proportion to rotation speed of rotor.

The cavity made by combination of rotor and stator is moved forward by the rotation of the rotor. Then, vacuum and pressure are generated at each of the pump inlet and outlet, resulting in successively dispensing of the material.

Accurate and consistent dispensing of material regardless of environmental factors

Due to the environment, materials are dispensed accurately and consistently even if viscosity changes or differential head changes in the container.

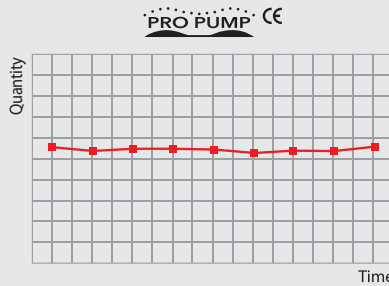

Clean dispensing without ball-up effect at the nozzle tip

The snuff-back function, which snuff back the material drop formed, eliminates or minimizes ball-up at the nozzle tip.

Consistent dispensing with non-pulsating by the movement of rotor and stator

Regardless of the position of the rotor, the cross-sectional area of constant cavity always create a constant pressure so that the exact metered volume can be dispensed consistently.

Even dispensing by precise metering of materials that are difficult to dispense by using gear pump or pneumatic valve

Precise volume of material with filler is dispensed without impairing fillers under the cavity displacement dispensing process.

Disassembly and reassembly for maintenance and cleaning is easy because of simple structure of the pumping unit.

PCP-Series 1K PRO-PUMP®

Item	Model	PCP-005	PCP-015	PCP-050	PCP-150	PCP-500
Dimension (WxHxD) (mm)		27 x 27 x 230			29 x 29 x 280

Material Outlet Port		LUER LOCK or BSPT 1/4	LUER LOCK or BSPT 3/8	BSPT 1/2		BSPT 3/4
Controller		PROCON-100				

PRO-PUMP PCP series is a compact and innovative 1-component dispenser that delivers excellent accuracy to the dispensing of difficult materials.

Because there is a perfect sealed space between the rotor and stator, it can maintain a higher degree of vacuum compared to the gear pump, so it has excellent material suction capability.

Non-pulsation, this can keep flow rate very constant.

The volume of the conveyed material is in proportion to the rotation speed of rotor, regardless of dosing pressure, so adjusting the number of rotor's rotations allows accurate conveyance and dispensing of materials which are difficult to handle.

PRO-PUMP can work without any valves and also the conveyance of material can be reversed.

TAEHA's innovate rubber forming technology makes it easy to dispense material containing filler of high degree.

(High Filler Stator, High Filler Rotor)

PRO-DUO PUMP series is a compact and innovative 2-component dispenser that delivers excellent accuracy to the dispensing of difficult materials. This volumetric pump that allows the user to directly control the mix ratio of the 2-component materials

It has originality eccentric screw structure, so it is dispensed steadily by mixing 2-component material for a long time. It is highly efficient, reproducible, accurate and high degree of precision compared to other volumetric pumps. The volume of dosing can be adjusted quickly and easily with the control of the rotation and speed of the rotor. Possible to be applied to various situations, such as viscosity or mixing ratio difference between 2-component materials. Replacing the disposable mixer instead of cleaning the pump itself makes maintenance easier and economical dispensing possible.

The PDPX series is a pump that is applied when the viscosity difference or mixing ratio between the two components is big, and is produced by combining pumps of different capacities. There are various X-combinations of pumps and please consult with our sales representative before producing pumps.

External Controller

Multi-controller for multiple system

Driver-type system that allows users to control dispensing easily in the way they want, such as PC and PLC.

PRO EXTERNAL CONTROLLER

PEC Series

The communication control function (MODBUS) allows you to set the parameter and monitoring on the parent PC.

External shot signals can be answered without delay for dispensing of accurate and control

The variable speed can be applied and channels can be changed while the system is in operation,

so it is more responsive to various dispensing condition and change.

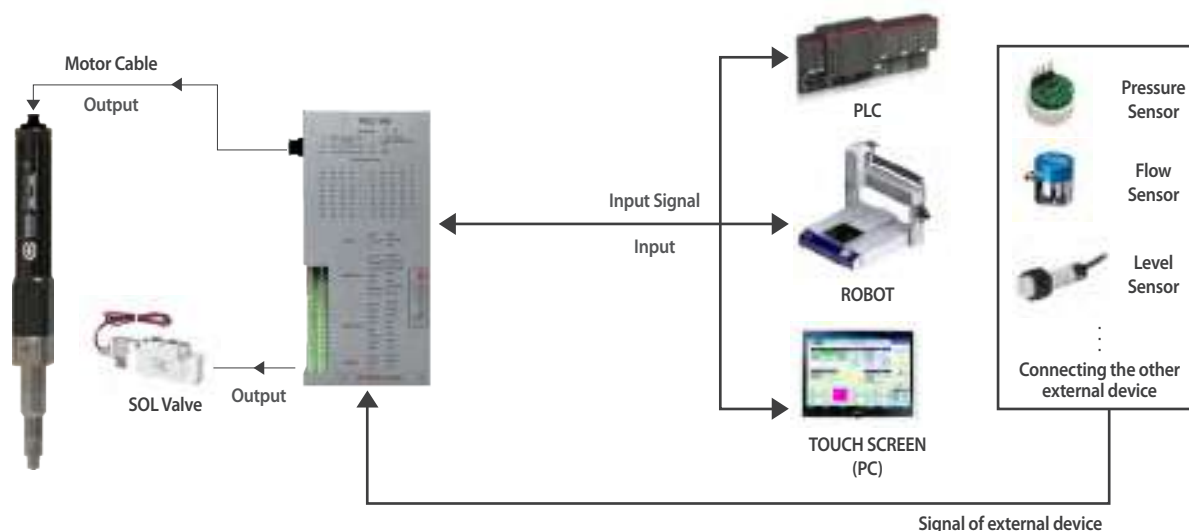

Applications with various sensors such as pressure sensors, residual sensors and flow sensors can be implemented.

Various dispensing conditions can be set through the three operating mode(TIME/STEADY/METERING)

Item	Model	PEC-100	PDEC-100

2K ANTI DRIP VALVE

Applying ADVU to the 2K PDP, when dispensing,

it minimizes the material's formation and prevents the dripping of the material.

There are 7 types of Anti Drip Valve depending on the type of material, volume of dispensing,

dispensing requirement and etc., and they can be used in UNIT style by applying a dedicated bracket for each of ADV type.

PSP-Series 1K PRO-SPRAY Series®

Item	Model	PSP-015	PSP-050	PSP-150	PSP-500
Dimension(□xLx∅)		27x296x18mm		29x346x18mm	
Weight		420g		610g	
Angle of spray		5~30 °			
Dispensing Volume		0.1~0.6ml/min		0.3~18.0ml/min	
Viscosity		10~50,000cPs			
Spray Air Pressure		0~500kpa			
Material Inlet Port		BSPT 1/4		BSPT 1/4	
Spray Air Hose		∅4			
Motor Speed		0~120RPM			
Dosing Accuracy		±1%			
Orifice of Dosing		∅0.5~∅0.8			

It is an ultra-high precision volumetric spray dispensing system that produces ultra-fine to massive discharges by using combinations of material supplying pressure and spraying air pressure. It is possible to control and set the spray line width in various ways by systemizing it with dedicated control equipment. Equipped with various types of spray nozzles, it may dispense in the shape desired by customers (see the table below).

The design of the special vortex structure may prevent losses of materials and contamination in the surrounding areas caused by scattering or overspraying.

The combination of the sprayed amount and air pressure can be conveniently set, enabling spraying discharge for various purposes.

Spray Nozzle Type	MS (Micro Spray)	WC (Wide cone)	FF (Flat Fan)
Appearance of Nozzle and Spraying			

It is an ultra-high precision volumetric spray dispensing system that produces ultra-fine to massive discharges by using combinations of material supplying pressure and spraying air pressure.

PRO-SPRAY CONTROLLER PSC-100

Item	Model	PSC-100
Dimension(W x H x D)		240 x 116 x 230mm
Weight		3.6kgf
Power		AC 100 ~ 240V, 50/60Hz
Power Consumption		50 W
Display		5.0inch TFT LCD, Touch panel
Operating Mode		Time / Steady / Auto
Memory		32ch
Air Pressure		0 ~ 0.7MPa
Inlet Port		One Touch Fitting PC (Ø6 Air Hose, Max. 0.7MPa)
Outlet Port		Auto Joiner (PH-H4)
Interface		RS232, D_SUB 9 PIN
Input Signal		NPN or Normal Open Signal
Dosing End Signal		NPN or Open Collector
Temperature		10 ~ 40°C
Humidity		30 ~ 70 %
Standard Component		Motor Cable(2m) , Controller Cable(2m) Power Cord, Air Connect Tube (2.5m)

The exclusive software for the PSP dispensing pump facilitates precision with various functions for spraying or dispensing. With the application of the 5.4inch color touch screen, it is excellent in data recognition and easy to operate. Excellent compatibility with other devices such as a PC, PLC, etc. with a memory function (30ch) for setting the memory. External interface functions facilitate the continuous execution of various tasks. With the intuitive operation settings and data changes, it is easy to operate. It's possible to set various dispensing conditions freely with the TIME/STEADY/AUTO modes.

Various dispensing specifications

We will help to increase customer satisfaction by applying TAEHA's various systems to dispensing tasks with tricky materials or complicated processes.

 TAEHA Corporation

QUICK VALVE & CONTROLLER QV-30D/QVC-100

The precision valves can dramatically reduce the dispensing time with the high-speed operation and non-contact jetting valves, and it's possible to dispense even a small amount with excellent precision ($\pm 2\%$).
The spray-discharge method does not affect the needle clearance (up to 30mm) and adopts a non-contact method that does not touch the product to be discharged, so there is no risk of product damage and there is no relation to the curvature of the product's surface.
It can be applied to various low to medium viscous materials such as conformal coating, flux, grease, silver paste, tuffy, UV liquid and epoxy.
The valve structure is simple, so product maintenance and equipment application are easy.

Inlet Port	PT 1/8	Weight	1.0kg
Weight	712g		

SPEC-PP

The pneumatic double-acting pump precisely measures and discharges low viscosity liquids (to 5,000 cps or less) A stable and precise discharge is generated by selecting the appropriate plunger according to the dispensing volume. There are a total of 5 models with maximum discharge volumes of 0.15, 1, 3, 5 and 10cc, which enable fine adjustment with a micrometer.

Material Outlet Port

Material Inlet Port

Micrometer

High Precision

Dispensing low-viscosity liquids of 5,000 cps or less with a high precision of $\pm 0.5\%$ error.

High Reliability

This standardized product generates an accurate and stable discharge in a fixed quantity.

High Durability

It's possible to discharge in a fixed quantity for a long time by using a seal made with a high-elastic and abrasion-resistant special material.

High Responsiveness

It's possible to change the materials and specifications to apply to various liquids.

<8-ARRAY PLUNGER PUMP SYSTEM>

Applicable Material

- Industrial : oil, adhesive, solvents, electrolyte, etc
- Food : sauce, jam, syrup, etc
- Cosmetic : lotion, cream, shampoo, conditioner, perfume, air freshener, etc
- Bio : reagent, enzyme, etc

The volumetric precision dispensing pump uses a plunger to stably and accurately dispense low viscous liquids.

TAEHA CAN PUMP TCP Series

As the canned liquid is transferred, no foreign substances or air bubbles are flowing in it. Air doesn't enter and contact doesn't occur due to the application of the special follow plate. Also, no remaining liquid is on the inner wall of the container. The application of a new concept of the high-performance piston pump achieves the best performance and improves efficiency by minimizing pulsation. The TWIN-POST RAM structure provides robustness and stability as the motor part and pump part are separated, it is easy to use and maintain.

<None-plate type>

** The NP type plate has a viewing window, so it is possible to easily check the remaining amount of liquid in the pail container.

**Applicable
Material**

- High-viscosity material without flowability
- Grease, 1K Epoxy, silicone RTV, oil, cream solder and other high-viscosity material

TAEHA HIGH-PRESSURE HOSE LINE-UP

This is a line-up of high pressure hoses dedicated to carefully selected dispensers based on Taeha's extensive experience and know-how to transfer various fluids used as dispenser materials at high pressure in optimal environment.

(Polyolefin Type Hose)

(SUS Braided Type Hose)

P(Polyolefin) Type

- ① Excellent moisture barrier performance
- ② Excellent chemical resistance
- ③ Excellent non-pollution
- ④ Meets the US FDA's standards
- ⑤ Operating temperature range: -30°C~70°C

S(SUS Braided) Type

- ① Superior chemical resistance to almost all chemicals such as strong acids, strong alkalis and solvents compared to other hose materials
- ② Excellent performance in non-adhesiveness and low friction
- ③ Excellent purity without contamination by fluids
- ④ Operating temperature range: -30°C~270°C

Coupling(SUS304), Adapter(SUS304) Contact-angle : 37°

SPRAY DISPENSING VALVE SDV Series

Item	Model	SDV-200
Dimension(mm)		Ø27 x L142
Weight		260g
Operating Air Pressure		0.4~0.5MPa (Normal 0.45MPa)
Max. Dosing Pressure		Max 0.7MPa
Spray Type		External mixing type
Viscosity		Low~Medium viscosity
Material of Part		Body, Piston:SUS303F Seat, Needle:Tungsten Carbide
Nozzle type	WS Nozzle	
	FS Nozzle	
	MS Nozzle	

The low pressure and low flow type generate a uniform and fine spray discharge without over-spraying or scattering.

The tungsten carbide material is very durable.

The spray valve in the external mixing method whose nozzle end is not blocked dispenses the spray particles uniformly and finely. It is good for stable spraying work.

It's easy to control the spray flow rate by utilizing the micrometer head, fine angle nozzle and needle.

The lineup of nozzles with various patterns can provide the spray width and patterns desired by the customers.

〈Spray Controller SVC-300〉

Item	SVC-300
Dimension (WxHxD)	164x139x243.4(mm)
Weight	3.7kg
Power	AC 220V, 50/60Hz
Power Consumption	15W
Display	2.5" TFT LCD
Operating Method	Touch panel, Button, Rotary Knob
Operating Mode	Time Mode / Steady Mode / Interval Mode
Input Signal Time	More than 20ms
Shot Start Signal	Foot switch / NPN signal
Shot End Signal	NPN open collector
STD Component	Foot switch, Power cord, Air hose Ø4.0 1.5M

Compressed air and liquid blend perfectly to achieve ultra-fine spraying

Using Barrel		3cc	5cc	10cc	30cc

A pen-type dispenser that does not need to use air and can precisely dispense very small amounts with a motor-driven method.

It is a new concept of dispenser that can conveniently and stably dispense ultra-fine amounts.

-Dosing volume-

NANO PEN 3 : 1.9μl/step

NANO PEN 10 : 13.4μl/step

NANO PEN 5 : 6.84μl/step

NANO PEN 30 : 138μl/step

The magnet applied inside the nano-pen makes it easy to change barrels and set up.

With its simple and compact design and structure, it is easy to configure an automated line or a multi-layer system, and it can be applied to various applications due to the high-speed discharge.

※ Barrels with a 3, 5, 10 and 30cc capacity can be applied. A barrel and a plunger dedicated for each barrel must be used.

The compact pen-type high-precision dispensing system quantitatively discharges very small amounts via the motor drive and electronic methods without air-pressure

nano pen

SPEC Series

NANO PEN BASIC SYSTEM

The Nano Pen System has a dedicated controller (NPC-10) and a nano-pen as a default to discharge a very small amount stably and with high-precision. **The NPC-10** is a dedicated controller for the nano-pen basic system and has digital multi-functions, so you can easily control the discharge volume with just a simple operation.

NPC-10	
Dimension(WxHxD)	158x80x110(mm)
Weight	932g
Power Input	DC 9V/2A
Power Consumption	15W
Operating Mode	TIME / STEADY/ SEQUENCE / INTERVAL
Display	3.2" Touch Screen
Interface	RS485(MODBUS)
Input Signal	Contact Input
Output Signal	NPN Open Collector
STD Component	Power cord, Motor Cable, Foot S/W

NANO PEN WITH VALVE SYSTEM

It's possible to discharge a very small amount of liquid containing a filler (with low to high viscosity) at the size of $\varnothing 0.5$ or less by applying an anti-drip valve (refer to ADV5/ADV7, p23) to the NANO-PEN.

It removes residual pressure that may occur when micro-spot dispensing is applied, and it prevents dehydration cakes, preventing the clogging of the nozzle tip due to filler. **The NPC-10V** is a dedicated control device for the nano-pen with a valve system that can control various dispensing conditions stably and easily with just a simple operation by providing multiple functions digitally. With the color touch screen, the operator can control the data easily and clearly.

NPC-10V	
Dimension(WxHxD)	215x109x172(mm)
Weight	1.5kg
Power Input	100-240V/60Hz

Display	5" TFT LCD
Interface	Touch Panel, Button, Rotary Knob
Input Signal	Contact Input
Output Signal	NPN Open Collector
STD Component	Power cord, Motor Cable, Foot S/W

PROCURE Series

The one-stop UV dispensing and curing facility consists of a dispenser and UV LED irradiator as one system. By modularizing the ultra-precision dispenser POR-PUMP and a high-performance UV LED curing machine, the operator can select and operate the specific process you desire according to your work (Dispensing Only / UV Curing Only / Dispensing+Curing)
 It responds to a variety of customer needs, including setting the discharge volume and discharge shape, UV irradiation intensity, and UV irradiation pattern.
 The modularized facility has a simple product structure standardized and mass-produced to increase customer productivity and efficiency.

**One-stop process UV curing and dispensing

It is applied to facilities that require quantitative discharge by dissolving materials such as liquids or hot melts that are sensitive to temperature and require constant temperature maintenance. It may implement a variety of applications according to the size of the material supply container and the heating temperature range. It provides stability to the state of the material and the dispensing result as it transfers heat uniformly to all the material containers. (General type barrels are available at of 30~80°C and heat-resistant barrels are available at 170°C.)

SPEC-1,2,3,4

BARREL SYSTEM SPEC-1

As a method of dispensing by supplying air, the minimum dispensing volume is 0.0001cc, and the dispensing volume can be adjusted according to the time/pressure/needle size.

- ① Controller (See the page of 47 for details)
- ② Adapter Assembly
- ③ O-Ring
- ④ Barrel Cap
- ⑤ Plunger
- ⑥ Barrel
- ⑦ End Tip, Needles
- ⑧ Barrel Switch
- ⑨ Foot Switch

(See the page of 67~ for details)

CARTRIDGE SYSTEM SPEC-2

Like the SPEC-1, this system dispenses materials by supplying air and uses the material in a large dispensing volume contained in a cartridge. Cartridge-related accessories are required and are useful for dispensing large quantities.

- ① Controller (See the page of 47 for details)
- ② Connector Tube
- ③ Cartridge Holder Cap
- ④ Cartridge Cap
- ⑤ Cartridge Plunger
- ⑥ Cartridge
- ⑦ Cartridge Holder
- ⑧ Holder Clamp
- ⑨ Cartridge Plug
- ⑩ Needle Adapter
- ⑪ H-Stand
- ⑫ Foot Switch
- ⑬ Needles

(See the page of 67~ for details)

CARTRIDGE + VALVE SYSTEM

SPEC-3

By dispensing materials that are difficult to dispense with the SPEC-2 using a valve, it is possible to prevent the drop phenomenon of the low viscosity liquid. By applying a valve, it is possible to minimize the change in dispensing volume due to the difference in water head that may occur in SPECS 1 and 2.

- ① Controller (See the page of 47 for details)
 - ② Connector Tube
 - ③ Regulator Set
 - ④ Cartridge Holder Cap
 - ⑤ Cartridge Cap
 - ⑥ Cartridge Plunger
 - ⑦ Cartridge
 - ⑧ Cartridge Holder
 - ⑨ Cartridge Elbow
 - ⑩ End Tip, Needles
 - ⑪ Precision Valves (See the page of 44 for details)
- (See the page of 68~ for details)

VALVE + TANK SYSTEM

SPEC-4

The system can dispense a large amount of liquid by using a pressure tank and valve together, and dispenses the liquid pumped from the pressure tank through the valve.

THE-100

- It adopts a high-performance microprocessor and high-speed air pulse circuit that produce a fast and stable liquid dispensing volume
- Smart dispensing control equipment made with extensive experience and technical expertise
- Superior reliability and durability with only a few minor failures
- Small and compact design for easy installation
- Great functions at a reasonable price
- Vacuum function available

Power	AC220VAC, 50/60Hz
Power Consumption	10W
Air Pressure	max 0.99MPa, Oil-free Dry Air
Air Pressure Range	0.02-0.6MPa
Shot Time Range	0.01-9.99sec
Operating Mode	Timer / Steady/ Interval (Interval time 0.01~9.99sec)
Input Signal	Foot S/W, Barrel S/W, Non-voltage N.O contact
Input Signal Time	More than 0.1s
Shot End Signal	N.O Relay contact
Vacuum	0~450Kpa
Temperature	5-40°C
Dimension	180(W)x70(H)x154(D)mm
Weight	2.3kg
STD Component	Foot S/W, Power Cord, Barrel Stand

THE-100R

- It adopts a high-performance microprocessor and high-speed air pulse circuit that produce a fast and stable liquid dispensing volume
- Smart dispensing control equipment made with extensive experience and technical expertise
- Superior reliability and durability with only a few minor failures
- Small and compact design for easy installation
- Great functions at a reasonable price
- Applicable to 2-way valve

Power	AC220VAC, 50/60Hz
Power Consumption	10W
Air Pressure	max 0.99MPa, Oil-free Dry Air
Air Pressure Range	0.02-0.6MPa
Shot Time Range	0.01-9.99sec
Operating Mode	Timer / Steady/ Interval (Interval time 0.01~9.99sec)
Input Signal	Foot S/W, Barrel S/W, Non-voltage N.O contact
Input Signal Time	More than 0.1s
Shot End Signal	N.O Relay contact
Vacuum	0~450Kpa
Temperature	5-40°C
Dimension	180(W)x70(H)x154(D)mm
Weight	2.3kg
STD Component	Foot S/W, Power Cord, Barrel Stand

The precision dispenser quickly and accurately controls the dispensing volume

D/P
Unit

THE-200

- Faster and more stable dispensing volume than the THE-100 series by applying a precision regulator
- Precise and stable pressure setting possible by installing a pressure sensor
- Adjust the dispensing time in a unit of 0.001 seconds
- Adjust the time and pressure with the digital display
- Superior reliability and durability with only a few minor failures
- Small and compact design for easy installation
- Great functions at a reasonable price

Power	AC220VAC, 50/60Hz
Power Consumption	10W(max)
Air Pressure	1.0MPa, Oil-free Dry Air
Air Pressure Range	15~600KPa (Low pressure 15~400KPa)
Shot Time Range	0.001-9.999sec
Operating Mode	Timer / Steady/ Interval (Interval time 0.01~9.99sec)
Input Signal	Timer / Steady/ Interval (Interval time 0.01~9.99sec)
Input Signal Time	More than 0.5sec
Shot End Signal	Photo coupler output (Relay output)
Vacuum	0~450Kpa
Temperature	5~40°C
Dimension	212(W)x78(H)x239(D)mm
Weight	4.0kg
STD Component	Foot S/W, Power Cord, Barrel Stand

TUBING PUMP TP-50

A dispenser dispensing low viscosity liquids in trace amounts quickly, accurately and stably

TP-50

- The dispenser control equipment has excellent performance for dispensing low viscosity liquids such as instant adhesive, anaerobic bond, ink, and solvent.
- Dispense the liquid without air pressure by rotating the rotor.
- TAEHA's unique head structure reduces the occurrence of air bubbles in the material transfer Teflon tube and increases the life of the tube.
- Excellent quantity in the micro-step controlling method
- Superior reliability and durability with only a few minor failures
- Small and compact design for easy installation
- Great functions at a reasonable price

Power	AC220VAC, 50/60Hz
Power Consumption	10W(max)
RPM	0-160RPM
Angle of Rotation	Shot : 0~999° Vacuum : 1~999°
Shot Volume	Min 0.0001cc (Using teflon tube size of Ø0.3xØ0.8)
Vacuum	0~450kpa
Viscosity	Less than 5,000cps
Dimension	177(W)x83(H)x183(D)mm
Weight	3.5kg
STD Component	Foot S/W, Power Cord, Nozzle Holder Teflon tube 5m

Accessories for TP-50

<Teflon tube>

* Spec. of Teflon tube

Model	O.D.(mm)	I.D.(mm)

<Nozzle Holder>

: Hold the tube and connect it to the needle.
The holder tip is changed according to the size of the tube

<Cup Holder>

: Holder for storing adhesive containers

<Nozzle Holder S/W>

: The holder tip is changed according to the size of the tube

<Cup Holder Bracket>

RDU-200

- This is a machine for circular coating application that dispenses the fluid materials in a fixed quantity in a circumferential shape by rotating the work required for a circular coating application on a turntable.
- Stable circular coating work is possible by automatically controlling the equipment operation/movement/up/down movement/rotation/stop with a single input signal.
- The control function of the RDU-200, which combines our unique liquid control technology and expertise, provides the best circular coating application while making various products simple.
- There is no condensation after dispensing due to the electronically driven vacuum function.
- Possible to finely adjust by adopting a micrometer in the UP/DOWN part.
- Compact design for easy installation

Power	AC220VAC, 50/60 Hz, 250VA
Controller	Control by microprocessor
Display	20x4 Dot Matrix Screen
Driving Method	Stepping Motor
Vacuum	Electronically Driven Vacuum
Air Cylinder	30mm stroke (Up-down)
Turn Table	Min 10RPM ~ Max 300RPM
Shot Range	Ø150
Dimension	290(W)x540(H)x325(D)mm
Weight	15kg

Option : 90° →

↓ Option : 60°

DISPENSING VALVE

DV Series

TAEHA's Pneumatic metering valves are widely used in various industries to provide reliable and accurate dispensing solutions. From low-viscosity materials to high-viscosity materials that are difficult to dispense, we have a lineup of valves that can dispense accurately and consistently. Excellent product quality control by owning a dedicated facility that processes and produces valve precision parts. Experience highly reliable metering valves that combine the expertise of Taeha's long-standing dispenser with our unique valve design.

Mini Diaphragm Valve

DV-10

- **Features**
Excellent for dispensing low-viscous material in a small and fine quantity
- **Applicable Material**
Low viscosity material such as reagent, solvent, flux, ink, electrolyte, etc

- **Specifications**

Dimension(mm)	Ø19.0 x L63.5	
Weight	80g	
Driving Air Pressure	More than 0.4MPa	
Material Feeding Pressure	Max. 0.6MPa	
Port Size	Air_IN	Ø4 Hose
	Material_IN	M5
	Material_OUT	LUER LOCK(male)
Flux (KV value)	1.1L/min	
Driving Part Material	SUS303	
Wetted Part Material	SUS303, UHMW-PE	

Diaphragm Valve

DV-100

- **Features**
Excellent for dispensing low-viscous material in a small and fine quantity. Good chemical resistance due to polymer material of wetted part
- **Applicable Material**
Low viscosity material such as reagent, solvent, instant glue, anaerobic adhesive, flux, ink, electrolyte, etc

- **Specifications**

Dimension(mm)	Ø27.0 x L79.5	
Weight	80g	
Driving Air Pressure	More than 0.4MPa	
Material Feeding Pressure	Max. 0.5MPa	
Port Size	Air_IN	Ø6 Hose
	Material_IN	BSPT 1/8
	Material_OUT	LUER LOCK(male)
Flux (KV value)	0.3L/min	
Driving Part Material	Aluminum	
Wetted Part Material	UHMW-PE	

Needle Valve

DV-200

- **Features**
Durable through using of diaphragm. Simple structure for application to various materials.
- **Applicable Material**
Low~medium viscosity material such as solvent, silicone oil, epoxy, containing filler, etc

- **Specifications**

Dimension(mm)	□23.0 x L99.5	
Weight	170g	
Driving Air Pressure	More than 0.4MPa	
Material Feeding Pressure	Max. 0.6MPa	
Port Size	Air_IN	Ø6 Hose
	Material_IN	BSPT 1/8
	Material_OUT	LUER LOCK(male)
Flux (KV value)	1.7L/min	
Driving Part Material	Aluminum	
Wetted Part Material	SUS303	

Needle Valve

DV-200S

- Features
Suitable for material requiring fine dispensing. Less ball-up effect and easy for needle replacement
- Applicable Material
Low~ medium viscosity material
- Specifications

Dimension(mm)	Ø27.0 x L95.0	
Weight	140g	
Driving Air Pressure	More than 0.4MPa	
Material Feeding Pressure	Max. 0.5MPa	
Port Size	Air_IN	Ø6 Hose
	Material_IN	BSPT 1/8
	Material_OUT	LUER LOCK(male)
Flux (KV value)	0.6L/min	
Driving Part Material	Aluminum	
Wetted Part Material	SUS303, PEEK	

Needle Valve

DV-200H

- Features
Knob for easy regulating the flux, Good durability due to special seal structure
- Applicable Material
High viscosity of RTV silicone and grease, epoxy, etc
- Specifications

Dimension(mm)	□25.0 x L135.7	
Weight	240g	
Driving Air Pressure	More than 0.4MPa	
Material Feeding Pressure	Max. 12.0MPa	
Port Size	Air_IN	Ø6 Hose
	Material_IN	BSPT 1/8
	Material_OUT	LUER LOCK(male)
Flux (KV value)	1.5L/min	
Driving Part Material	Aluminum	
Wetted Part Material	SUS303	

Needle Valve

DV-20F

- Features
Lightweight and compact type that's good for multi-structure design, Less ball-up effect due to open/close at the highest end Excellent for a precise and small dot of dispensing by minimizing the internal volume of the material contacting unit
- Applicable Material
Low~ medium viscosity material
- Specifications

Dimension(mm)	W12.0 x D48.5 x H113.3	
Weight	140g	
Driving Air Pressure	More than 0.4MPa	
Material Feeding Pressure	Max. 0.5MPa	
Port Size	Air_IN	Ø4 Hose
	Material_IN	BSPT 1/8
	Material_OUT	NEEDLE ADAPTER (NUT type)
Flux (KV value)	0.5L/min	
Driving Part Material	Aluminum	
Wetted Part Material	SUS303	

Poppet Valve

DV-300

- Features
Due to designing of snuff-back structure, less ball-up effect after dispensing
- Applicable Material
Low~ medium viscosity material

- Specifications

Dimension(mm)	Ø29,0 x L126,5
Weight	200g
Driving Air Pressure	More than 0,4MPa
Material Feeding Pressure	Max. 0,6MPa
Port Size	Air_IN Ø6 Hose
	Material_IN BSPT 1/8
	Material_OUT LUER LOCK(male)
Flux (KV value)	2,4L/min
Driving Part Material	Aluminum
Wetted Part Material	Aluminum

Poppet Valve

DV-300R

- Features
For Medium/high pressure of DV-300, Due to designing of snuff-back structure, less ball-up effect after dispensing
- Applicable Material
Medium ~high viscosity material

- Specifications

Dimension(mm)	□29,0 x L125,2
Weight	260g
Driving Air Pressure	More than 0,4MPa
Material Feeding Pressure	Max. 5,0MPa
Port Size	Air_IN Ø6 Hose
	Material_IN BSPT 1/4
	Material_OUT LUER LOCK(male)
Flux (KV value)	1,8L/min
Driving Part Material	Aluminum
Wetted Part Material	Aluminum

* Option of Inlet port : AN Fitting(1/4", 3/8", 1/2", 3/4")

Poppet Valve

DV-300HF

- Features
For high-pressure, Excellent for material containing filler and good for great volume of flux
- Applicable Material
High viscosity material

- Specifications

Dimension(mm)	□46,0 x L181,5
Weight	850g
Driving Air Pressure	More than 0,4MPa
Material Feeding Pressure	Max. 15,0MPa
Port Size	Air_IN Ø6 Hose
	Material_IN BSPT 1/4
	Material_OUT BSPT 1/4
Flux (KV value)	1,9L/min
Driving Part Material	Aluminum
Wetted Part Material	Aluminum

* Option of Inlet port : AN Fitting(1/4", 3/8", 1/2", 3/4")

DISPENSING VALVE DV Series

Poppet Valve

DV-300RH

- Features

Horizontal type of DV-300R,
Due to designing of snuff-back
structure, less ball-up effect
after dispensing

- Applicable Material

Low~ medium viscosity material

- Specifications

Dimension(mm)		W29,0 x D122,0 x H75,0
Weight		340g
Driving Air Pressure		More than 0,4MPa
Material Feeding Pressure		Max. 0,5MPa
Port Size	Air_IN	Ø6 Hose
	Material_IN	exclusive QUICK ADAPTER
	Material_OUT	LUER LOCK(male)

Flux (KV value)	1,9L/min
Driving Part Material	Aluminum
Wetted Part Material	Aluminum

Poppet Valve

DV-30H

- Features

Small & horizontal type of DV-300
Good for installing to multi-head

- Applicable Material

Low~ medium viscosity material

- Specifications

Dimension(mm)		W23,0 x D65,4 x H51,0
Weight		82g
Driving Air Pressure		More than 0,4MPa
Material Feeding Pressure		Max. 0,6MPa
Port Size	Air_IN	Ø6 Hose
	Material_IN	BSPT 1/8
	Material_OUT	LUER LOCK(male)

Flux (KV value)	1,2L/min
Driving Part Material	Aluminum
Wetted Part Material	SUS303

Poppet Valve

DV-30V

- Features

Small & vertical type of DV-300
Good for installing to multi-head

- Applicable Material

Low~ medium viscosity material

- Specifications

Dimension(mm)		□ 23,0 x L82,4
Weight		82g
Driving Air Pressure		More than 0,4MPa
Material Feeding Pressure		Max. 0,6MPa
Port Size	Air_IN	Ø6 Hose
	Material_IN	BSPT 1/8
	Material_OUT	LUER LOCK(male)
Flux (KV value)		1,2L/min
Driving Part Material		Aluminum
Wetted Part Material		Aluminum

DISPENSING VALVE DV Series

D/P
Unit

Spool Valve

DV-400

- **Features**
A durable high-pressure valve, Due to excellent snuff-back structure, less ball-up effect after dispensing
- **Applicable Material**
Medium~high viscosity material

- Specifications

Dimension(mm)	□ 23,0 x L117,5	
Weight	260g	
Driving Air Pressure	More than 0.4MPa	
Material Feeding Pressure	Max. 5.0MPa	
Port Size	Air_IN	Ø6 Hose
	Material_IN	BSPT 1/8
	Material_OUT	BSPT 1/8
Flux (KV value)	2.1L/min	
Driving Part Material	SUS303	
Wetted Part Material	SUS303	

Spool Valve

DV-4000

- **Features**
A durable high-pressure valve, Due to excellent snuff-back structure, less ball-up effect after dispensing
- **Applicable Material**
Medium~high viscosity material

- Specifications

Dimension(mm)	□ 38,0 x L159,0	
Weight	480g	
Driving Air Pressure	More than 0.4MPa	
Material Feeding Pressure	Max. 15.0MPa	
Port Size	Air_IN	Ø6 Hose
	Material_IN	BSPT 1/4
	Material_OUT	LUER LOCK(male), BSPT 1/4
Flux (KV value)	2.3L/min(LUER LOCK), 3.5L/min(BSPT1/4)	
Driving Part Material	Aluminum	
Wetted Part Material	Aluminum	

Slide Valve

DV-50W

- **Features**
Excellent for dispensing high-filler materials in a precise and tiny quantity
- **Applicable Material**
Medium~high viscosity material and material containing high-filler (solder paste, silver paste, thermal grease, etc)

- Specifications

Dimension(mm)	W29,0 x D63,0 x H73,5	
Weight	200g	
Driving Air Pressure	More than 0.45~0.6MPa	
Material Feeding Pressure	Max. 10.0MPa	
Port Size	Air_IN	Ø4 HOSE
	Material_IN	LUER LOCK , BSPT 1/4
	Material_OUT	LUER LOCK(male)
Flux (KV value)	1.7L/min	
Driving Part Material	Aluminum	
Wetted Part Material	AL, WC, HSS	

- **Features**
Excellent for various applications as the material of the wetted part can be changed according to the material used

METERING VALVE MV Series

Plunger Valve

PP-015

- Features
 - A volumetric valve for high precision dispensing.
 - Installed micrometer for fine regulating of shot volume
- Applicable Material
Low~ medium viscosity material
- Specifications

Dimension(mm)	□ 23,0 x L150,0	
Weight	320g	
Driving Air Pressure	More than 0,4MPa	
Material Feeding Pressure	Max. 0,03MPa (Spring : 0,3mm) Max. 0,12MPa (Spring : 0,5mm)	
Shot Volume	0,05~0,15cc	
Port Size	Air_IN	Ø4 Hose
	Material_IN	BSPT 1/8
	Material_OUT	LUER LOCK(male)
Driving Part Material	Aluminum	
Wetted Part Material	SUS303	

Metering Spool Valve

MSV-1

Excellent performance of fine dispensing with collaboration of metering chamber and high-pressure valve

- Features
 - A metering valve for high precision dispensing (accuracy ±1%)
 - Excellent durability due to special seal structure
 - Easy regulating the flux, Due to excellent snuff-back structure
 - Less ball-up effect after dispensing
- Applicable Material
Medium ~ high viscosity material
- Specifications

Dimension(mm)	□ 28,0 x L140,0	
Weight	280g	
Driving Air Pressure	More than 0,4MPa	
Material Feeding Pressure	Min. 2,5MPa, Max. 15,0MPa	
Shot Volume	0,02cc	
Port Size	Air_IN	Ø4 Hose
	Material_IN	BSPT 1/8
	Material_OUT	LUER LOCK(male)
Driving Part Material	Aluminum	
Wetted Part Material	Aluminum	

Metering Plunger Valve

MPV-01

Excellent performance of fine dispensing with collaboration of metering chamber of plunger type and ball-valve

- Features
 - High precision dispensing (accuracy ±1%)
 - Applicable to wide range of viscosity(10,000~500,000cps)
 - Metering chamber can be dispensed consistently regardless of viscosity or air pressure
 - Vent knob removes air bubbles in the metering chamber and allows fine dispensing
- Applicable Material
High~ medium viscosity material
- Specifications

Dimension(mm)	□ 25,0 x L121,0	
Weight	280g	
Driving Air Pressure	More than 0, 5MPa	
Material Feeding Pressure	Min. 0,2MPa, Max. 3,0MPa	
Shot Volume	0,005cc	
Port Size	Air_IN	Ø4 Hose
	Material_IN	BSPT 1/8
	Material_OUT	LUER LOCK(male), BSPT 1/8
Driving Part Material	Aluminum	
Wetted Part Material	SUS303	

Twin Dispensing Valve

TDV-300T

- Features

- Multi-purpose air pressure operated valve with a dedicated poppet type valve for a wide range of viscosity
- Due to excellent snuff-back structure, less ball-up effect after dispensing
- Mixing ratio of resin and hardener -> 1:1, 2:1, 4:1 and 10:1

- Applicable Material

Low~high viscosity material

- Specifications

Dimension(mm)	W70.0 x D35.0 x H133.2	
Weight	530g	
Driving Air Pressure	More than 0.4MPa	
Material Feeding Pressure	Max. 0.6MPa	
Port Size	Air_IN	Ø6 HOSE
	Material_IN	BSPT 1/4
	Material_OUT	MIX ADAPTER
Flux (KV value)	2.9L/min	
Driving Part Material	Aluminum	
Wetted Part Material	Aluminum	

Double Dispensing Valve

DDV-300

- Features

- Multi-purpose air pressure operated valve with a dedicated poppet type valve for a wide range of viscosity
- Due to excellent snuff-back structure, less ball-up effect after dispensing
- Mixing ratio of resin and hardener -> 1:1 only

- Applicable Material

Low~high viscosity material

- Specifications

Dimension(mm)	W62.0 x D37.0 x H157.2	
Weight	690g	
Driving Air Pressure	More than 0.4MPa	
Material Feeding Pressure	Max. 0.6MPa	
Port Size	Air_IN	Ø6 HOSE
	Material_IN	BSPT 1/4
	Material_OUT	MIX ADAPTER
Flux (KV value)	2.9L/min	
Driving Part Material	Aluminum	
Wetted Part Material	Aluminum	

TANK SSR / SSF Series

High efficiency in dispensing because a large amount of liquid is contained in the tank.

High responsiveness thanks to the various standardized options according to the characteristics of the liquids and the customers' needs (electrolytic polishing, Teflon coating, etc.)

Safety-certificated type can be custom-made to enhance work site stability.

As our products are standardized in various types of capacities (1-50L), with a method of inputting liquid directly and a method of using internal containers, we have the system that can be immediately delivered.

《《《 By applying Taeha's advanced dispensing expertise and our highly reliable pressure tank, we propose the most suitable applications for customers.

– Tank Specifications

Material	SUS304
Cover Type	Ferrule Clamp Type
Material Outlet	Bottom port(BSPT3/8", Female) *option : Top port
Polishing	Buff Polishing
Sealing	O-Ring(NBR), Capsule O-Ring(Viton) Silicone O-Ring, EPDM O-Ring
Operating Pressure	0.5MPa

〈TANK of OPTION〉

PRESSURE REGULATOR

Model	Description
TRS-04	G-Medium pressure type, 0~0.4Mpa
TRS-07	G-High pressure type, 0~0.7Mpa

The MFS/MFE series is a material supply-only equipment that transports and supplies 1-component and 2-component materials in a stable way. The device enables stable and economical process maintenance for a long period of time as it is possible to supply continuously and infinitely with one tank per material. It is a new concept of safety equipment that does not require industrial safety certification as it does not require compressed air. It is possible to freely adjust the vacuum degassing time, preheating function, and stirring function according to the characteristics of the materials.

By applying the vacuum pump, the inside of the tank containing the material can be kept in a vacuum state at all times. There is no hardening problem due to moisture in the air, so there is no need for cleaning a tank and the storage of liquid is excellent. Even if there is no separate degassing process (vacuum→pressurization→exhaust), the material remains completely degassed. It is suitable for preventing the hardening of materials that are particularly sensitive to moisture (polyurethane, conformal coating, etc.), and is a facility that can easily transport difficult liquids.

It is a new concept of a material feeding device that can additionally install various options in the facility according to the types of materials and the characteristics of the customers' processes. It can be combined with various dispensing devices and dispensers, so it is very easy to apply them to the production line. Composed of a tank of various capacities required for material supply and a tablet capable of a touch screen, it can be configured so that it is compact and easy to operate and maintain by the user.

Item	BASIC SPECIFICATIONS		Remarks
	MFS (AUTO-CONTROL)	MFE (MANUAL_CONTROL)	
Dimension WxHxD (mm)	1780 x 1950 x 900	1700x1300x600	*Based on STD V2020
Weight	≒ 250kg	≒ 200kg	*Weight & Size depends on the specifications of option product
Power	AC220V, 50/60Hz		
Power Consumption	250VA		
Tank Size	5L, 10L, 20L, 30L, 40L, 60L		*Special type can be custom-made
Operating Air Pressure	0.4~0.5MPa		
Feeding Air Pressure	0.1~0.5MPa		
User Interface	Touch PC (Windows10)	3WAY VALVE	
Temperature	10~40°C		
Humidity	10~85%RH		
Vibration Resistant	Less than 0.5G		
Controller	MSC-100	PEV	

MFS Automatic Control Type Series

With the user interface of the touch screen and the dedicated software installed, it is easy for the operator to operate and maintain. One-component and two-component options can be manufactured, and a variety of options are additionally applied to realize the supply of materials suitable for the customers' demands.

MFE Series of Manual Control Type

This specification is suitable for customers who want material feeding devices with similar performance at more reasonable prices. It is equipped with a manual control type dedicated controller controlled with a 3-way hand valve, so it is easy for the operator to operate and maintain and repair. One-component and two-component are possible to manufacture and a variety of options are additionally applied to realize the supply of materials suitable for customers' demands.

PRO-CP Series

The PRO-CAN PUMP is a facility that can feed materials cleanly without mixing foreign substances or air bubbles by transferring the material contained in the container as it is. High-viscosity liquids can be transported with high precision over long distances, and the materials in a fixed quantity are precisely fed by adopting an electric motor method instead of a drive method using air.

It is very economical because it can use up to 1% of the remaining liquid in the container by applying a special follower plate developed by our company. With the application of the AUTO AIR VENT, air bubbles are automatically removed without additional air bubbles when supplying and replacing materials. Various lineups are provided according to the size of the CAN container. Please consult with our sales manager to select the correct specifications.

PRO-CP (1K)

Dimension

PRO-CP (1K)

Model	PRO-CP20
Can Size	20kg
Weight	≒ 150kg
Air Pressure	0.4~0.5MPa (Humidity 5% less than, Air Filter 5μ less than)
Power	AC220V(±10%), 50/60Hz
Power Consumption	max 2.6kW
Display	5inch TFT LCD
Operating Method	Touch screen, Button S/W
Operating Mode	AUTO/MANUAL/TEST
Viscosity	1~500,000(cps)
Dosing Pressure	5.0MPa
Displacement	5.0ml/rev
Flux	max 300ml/min
Accuracy	±1%
Min. Feeding vol	25.0ml/min
Motor Speed	1~150rpm (60rpm Recommended)
Inlet Port	One touch fitting PC (∅8)
Outlet Port	BSPT 3/8, 1/2, 3/4, 1
Material of Stator	FFKM/EPDM
Temperature	0~50°C (Avoid direct sunlight)
Humidity	10~85%RH
Vibration Resistance	Less than 0.5G
Comm. Connector	LAN(Modbus TCP), RS485(Modus RTU)
Follower Plate	WP(Wiper Plate) / DP(Disposal Plate) / NP(None Plate)

A high-precision material feeding device with one-component and two-component types in an electric motor method that combines the CAN PUMP with the PRO-PUMP

PRO-CPD (2K) CE

PRO-CPD (2K)

Model	PRO-CPD20
Can Size	20kg
Weight	≈320kg
Air Pressure	0.4~0.5MPa (Humidity 5% less than, Air Filter 5μ less than)
Power	AC200V~240V, 50/60Hz
Power Consumption	5.2kW
Display	7inch TFT LCD
Operating Method	Touch screen, Button S/W
Operating Mode	AUTO/MANUAL/TEST
Viscosity	1~500,000(cps)
Dosing Pressure	5.0MPa
Displacement	5.0ml/rev
Flux	300ml/min
Accuracy	±1%
Min. Feeding vol	25.0ml/min
Motor Speed	1~150rpm (60rpm Recommended)
Inlet Port	One touch fitting PC (∅8)
Outlet Port	BSPT 3/8, 1/2, 3/4, 1
Material of Stator	FFKM/EPDM
Temperature	0~50°C (Avoid direct sunlight)
Humidity	10~85%RH
Vibration Resistance	Less than 0.5G
Comm. Connector	LAN(Modbus TCP), RS485(Modus RTU)
Follower Plate	WP(Wiper Plate) / DP(Disposal Plate) / NP(None Plate)

Dimension

Semi-Automated System

By incorporating a dispenser into high-end, high-performance tabletop robot equipment, it can be applied as a SEMI-AUTO system to the customers' various dispensing processes. With its simple and compact design and structure, it can be conveniently configured as an automatic system, and a variety of options can be selected. Please consult with the sales manager about the customer's required dispensing conditions and select an appropriate system.

JR3000F Heavy Duty Type

Be equipped with a feedback motor to carry heavy tool and workpiece payloads, Z-Axis brake is for preventing damage to the tool and workpiece

Easy Installation Camera

- The camera function is enhanced to accommodate more sophisticated industrial sites.
- The CCD camera is enhanced with functions of automatic calibration and counter to increase the utilization of the camera system.

Various Languages

- The Teaching Pendant contains more than 10 languages, so it is possible to easily program and perform robot work in various foreign countries.

More Robust Robot

- It is fast (a maximum speed of 900 /sec) with more reinforced stiffness, and accurate. The stability can be built to operate without stopping for a long time.
- When the camera with the more stable tracking function reaches the Z mechanism, even with the faster operation, it significantly reduces the robot's quiescent vibration, reducing latency by about 50 percent compared to the previous model.

Fieldbus Compatibility & Ethernet(LAN) Default Option

- The operator can select among CC LINK, DeviceNet, and PROFIBUS.
- It's equipped with a LAN port as a default, and it is possible to control several robots with one PC.

Robot Shaft & External Motor Control

- Just like handing the robot axis at the teaching pendant, the two-pulse string input device such as the stepping motor or servo motor is programmed.
- The robot is controlled by installing a conveyor by changing the worktable setting and the direction of the product to be worked.

FRAME CONFIGURATION

- Basic type
- Shelf type
- Full frame open type
- Full frame close type
- Full frame acryl cover type

The SEMI-AUTO system with a desktop robot can be installed in a narrow space, enabling the use of efficient space. The convenient and compact system enables precise motion control and discharge in a fixed quantity by a robot simultaneously. Easy to change a product and control enough to make it suitable for small quantity production of multiple products with a memory function. Excellent versatility with various combinations of dispensers and accessories. Since various frames for applying the SEMI-AUTO system are standardized, post management is easy.

PROS-100 Series

The in-line automation facility can be applied to various processes in industrial sites that require dispensing, such as under-fill, UV bonding, and epoxy molding. The system can transfer, align, apply a dispensing position, and dispense products with the all-in-one facility.

Features

Depending on the dispensing process, it is possible to select a dispenser suitable for materials such as silicone, epoxy, UV material, and acrylic. It is possible to select a variety of dispensers and material feeding devices, including barrel, cartridge, tank, pneumatic valve, plunger pump, PRO-PUMP and jetting valve.

It is an in-line automation facility that transfers products through a conveyor, aligns products by an orthogonal robot, sets the dispensing position with a 3-axis motion robot, and performs dispensing work with a dispenser.

It's possible to select the vision, conveyor type, dispenser, etc. as options depending on the product to be applied, use, work environment, and work process. The control PC with a 10-inch monitor in the basic operating environment of the facility and even PLC control can be selected as necessary.

Motion and conveyors are unique special products to minimize the facility's exterior size and to expand the internal work area. It is designed to realize the same working speed as a dual conveyor of the single size equipment in a structure that can operate a double stage on the X-axis line.

Specifications

Item	Specification	Remark
Dimensions W x D x H (mm)	1200 x 1150 x 1680 (mm)	This size depends on the specifications of option product
System Configuration	CONVEYOR + 3-AXIS CARTESIAN ROBOT + DISPENSER	
Power	AC220V, 50/60Hz 50A	3 PHASE
Control Method	PLC, TOUCH, TOUCH CONTROLLER	
User Interface	OPERATION PC, TEACHING PENDANT	
Power Consumption	5 bar over	
Operating Air Pressure	0.4~0.8MPa	
Dispensing robot	3-Axis Cartesian Robot (X:300, Y:200, Z:200mm)	
Robot Speed	LM GUIDE (MAX 600mm/sec)	Accuracy ±0.02mm

VDS-3C (3-Chamber)

When an air trap occurs due to the shape of the product to be dispensed, the liquid is dispensed in a vacuum environment to prevent air bubbles.

Three chambers, such as the INLET chamber-DISPENSING chamber (constant vacuum)-OUTLET chamber, etc., go through the process of input-dispense-discharge and provide a cleaner environment and a work process free from air bubbles.

It can be applied to the automation line and applied as an IN-LINE facility.

By applying touch panel display, it is easy for the operator to set, operate, maintain and repair. It is possible to check and control the exact vacuum pressure in the vacuum chamber by using the CONVECTION vacuum gauge. It is a system that can check the liquid capacity in a vacuum chamber by applying a capacitance sensor.

Custom-made facilities suitable for the customers' needs

You can experience Taeha's rich dispensing expertise through our customized automation solution.

Brush Needle

- A brush mainly used for dispensing on the surface and in a wide range, it's made of an anti-static material that does not come off easily.

It can be applied to a wide range of liquids such as base, coating material, lubricant, solvent, heat dissipation box, silicone, ink, etc.

BRUSH NEEDLE (L=42mm)				
Diameter of Brush	Gauge of Needle	Brush Type		Material of Brush
		Shpae	Hardness(Color)	
4mm	14G,15G,18G, 21G,23G,25G	Round	Soft(white), Hard(light brown)	PP
5mm		Round, Flat		
6mm		Round, Flat		
7mm		Flat		

* There are various models according to width, length, shape, and hardness of the needle gauges/brushes. Please consult with our sales manager to select according to your needs.

Needle Guide

- The role of holding and fixing a needle. Divided by gauge/needle type.

Special material needle guides can also be manufactured.

Please consult with our sales manager.

DISPENSING TIPS & NOZZLES

PreCision Nozzle

- Taeha's precision nozzle uses a ceramic tip to increase the reliability of precision and is very excellent in realizing ultra-fine dispensing.

1) **PCNA** : A separated structure of hub and nozzle tip. When the nozzle is clogged or damaged, only the tip can be replaced.

PCNA

2) **PCNB** : It is a tapered type with an integral structure of the hub and the nozzle tip. It is excellent in liquid fluidity and enables ultra-precise dispensing.

PCNB

3) **PCNC** : The screw-type fastening part and the integral structure of the HUB and the nozzle tip provide convenience when it is connected with other parts while simultaneously enabling ultra-precise dispensing.

PCNC

2-PIN/3-PIN Needle

- It is possible to dispense at two or three points at the same time, increasing the efficiency of the dispensing time and process. Pipe can be manufactured depending on the inner diameter and length of the pipe according to customers' requirements. Please consult with our sales manager.

*Material : Hub-Brass, Pipe-SUS304

Model
2MN - □ G - □
3MN - □ G - □

Shower Needle

- It is a needle used for simultaneous multi-point dispensing. It is possible for customers to determine the inner diameter, length, and position of the pipe according to the dispensing process. Please consult with our sales manager.

BARREL & ACCESSORIES

Barrel

- This dispensing container is used by filling the liquid to be dispensed. The material is made of polypropylene and the UV protective barrel is suitable for UV-curing liquids.

① Plungers

- Used to push the liquid contained in the barrel to deliver uniform air pressure.

*Material : PE
*MOQ : 50pcs

② Barrel Cap

- Used to seal the upper part of the barrel and store the remaining liquid.

*Material : PE
*MOQ : 50pcs

③ Adapter Assembly

- Used to supply air from the dispensing controller to the barrel.

*Material : Head(POM)
Hose(Soft PVC)
Oring(Silicone)
*MOQ : 1pcs

Barrel Stand

- Used to store the barrel upright during dispensing.

*Material : Steel
*MOQ : 1pcs

④ End Tip

- Used when the lower part of the barrel is sealed and the remaining liquid needs to be stored or transported.

*Material : PE
*MOQ : 50pcs

Barrel Switch

- Used when the operator turns on/off dispensing by attaching a switch to the barrel.

*MOQ : 1pcs

③ Cartridge Plunger

- Designed to fit the cartridge for perfect dispensing, it is used to push the material inside the cartridge cleanly without waste.

*Material : PE
*MOQ : 10pcs

④ Cartridge Cap

- The cartridge caps and plugs are used to fix plungers in the cartridge during transportation or storage and to seal the upper/lower part of the cartridge.

*Material : PE
*MOQ : 10pcs

⑤ Cartridge Plug

⑥ Cartridge Holder

- The cartridge holder set (composed of a holder body and a holder cap) is used to protect the cartridge and it is designed to withstand a pressure up to 0.7 MPa.

*Material : AL
*MOQ : 1pcs

CARTRIDGE & ACCESSORIES

Sealant Cartridges

- The system is made to be used by directly applying a 330-gram sealant cartridge container that is commercially available. Different adapters are used according to the manufacturers of the cartridges to be used. Please consult with our sales manager.

*Material : AL
*MOQ : 1pcs

Material maker	Model			Spec.
	Cartridge	QUICK type	STD type	
Henkel, Shinetsu, CLS, KCC (Korea)		QSA01 QSA-01-CHK 	SA01 	M15 x P2.5
Dow(TORAY), Shinetsu, Three bond (Japan)		QSA02 	SA02 	M21 x P2.0
Dow (US)		QSA03 		NPT 1/4
	Material	Teflon	Steel	

Cartridge Elbow

- Use to connect cartridge and valve

*Material : Nylon, SUS
*MOQ : 1pcs

Tube Adapter

- Applying an adapter to a tube-type container prevents the material from flowing at the needle.

*Material : POM
*MOQ : 1pcs

Regulator

- It is used to adjust the air pressure supplied to the pressure tank and cartridge. It is a one-touch type, so it is easy to connect and disconnect.

(G : General type, P : Precise type)

Model	Spec
TRS-04	G-Medium pressure type, 0~0.4Mpa
TRS-07	G-High pressure type, 0~0.7Mpa
TRS-04P	P-Medium pressure type, 0~0.4Mpa
TRS-07P	P-High pressure type, 0~0.7Mpa

Connector Tube

- It is used to supply air pressure from the controller to the cartridge or valve. It is a one-touch type, so it is easy to connect and disconnect.

*Tube Length : 1.2m
(custom-made on demand)

Cartridge Holder Calmp

- It is a clamp to fix the general cartridge holder and the sealant cartridge holder to the stand.

*Material : AL
*MOQ : 1pcs

Cartridge Stand

- It is a stand that can be fixed by variously adjusting the direction and height of the barrel, cartridge holder, valve, etc.

*Material : Steel

 **TAEHA Corporation**
Professional Quality in Liquid Dispensing

HISTORY

1994

*Establishment of TAEHA Engineering Co.,

1998

*Automatic UV Injection M/C developed
*Robot Dispensing System developed

2001~2003

*TAEHA's standard model of Dispenser Unit released

2005

*Malaysian partnership agreement signed
*Precision Spraying Dispensing System released

2009

*Establishment of Corporation in Tianjin, China (Feb.)

2011

*Establishment of TAEHA CORPORATION (Jul.)

 TAEHA Corporation

2014

- *Establishment of Branch in Shenzhen, China (Aug.)
- *Designated as Promising Gyeonggi-do Small and Medium Enterprise
- *Acquired 2 cases of Patent, 2 products of Trademark registration
- *Acquired 2 cases of New Design for Practical Use

2017~2019

- *Completed construction of TAEHA NANO CENTER (Jan. 2017)
- *Designated as Gyeonggi-do Good Work Place (2017)
- *Won Environment-friendly Building Award in Namyangju (NANO CENTER, 2018)
- *Participated Germany Hannover Messe (2018)
- *Designated Korea Gyeonggi-do Best Company for Women's Employment (2018)
- *Designated Promising Export Small and Medium Enterprise (2019)
- *The 25th Anniversary of establishment

2012

- *Relocation of new office building (Namyangju-si, Gyeonggi-do)

2013

- *Developed and patent application of PRO-PUMP
- *\$3 Million Export Tower Awarded
- *Designated as Gyeonggi-do Good Work Place

2016

- *Establishment of Branch in Gumi, Korea (Feb.)
- *Won the 50th Korean Engineer Award (RND center)
- *Won Outstanding Material Developer Award (CEO)

2020~

- *Continue to become a promising global company
